Russell 2000® Value Index

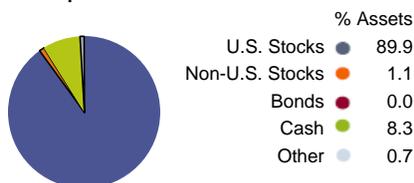

Investment Information

Investment Strategy

This is an index fund that seeks to match the return of the Russell 2000® Value Index by investing in a diversified sample of the stocks in the Index. The Index is comprised of small-cap US companies that have high dividend yields and low prices relative to their earnings or book value. These stocks are a subset of the Russell 2000® Index, which measures the performance of the 2000 smallest companies in the Russell 3000® Index. The Russell 3000 Index represents 98% of the total US equity market capitalization. Value investing focuses on long-term gains through a portfolio of stocks that experience lower volatility than higher growth stocks. This fund is intended for long-term investors seeking growth of capital. The risk level for this fund is high, as small-capitalization stocks tend to exhibit more volatility than larger capitalization stocks.
