

How to Join a DRS Webinar

We encourage you to log in to the webinar 5-15 minutes early to manage any technology issues. Periodic sound checks begin 15 minutes prior to the start of the webinar.

The [webinar link](#) brings you to this screen:

Internet Explorer and Chrome browsers provide the best experience on the webinars.

DRS Webinar

Host: DRS Education & Outreach [Add to my calendar](#)

[More information](#)

Your name:

Email address:

 [Join by browser](#)

Try the new WebEx web app!

- ✓ Not installed
- ✓ Simultaneous
- ✓ Ideal for participants who do not need to present

Enter your first name and your email address
Select **Join**
(do not "join by browser")

Do not Join by browser. Audio may be impaired and messages sent via the browser login may not be private.

 **Java is not working.**

To have the best experience joining meetings, Java must be installed on your computer and enabled in your browser and the Java Control Panel. Install and enable Java, restart your browser if needed, and then join the meeting again.

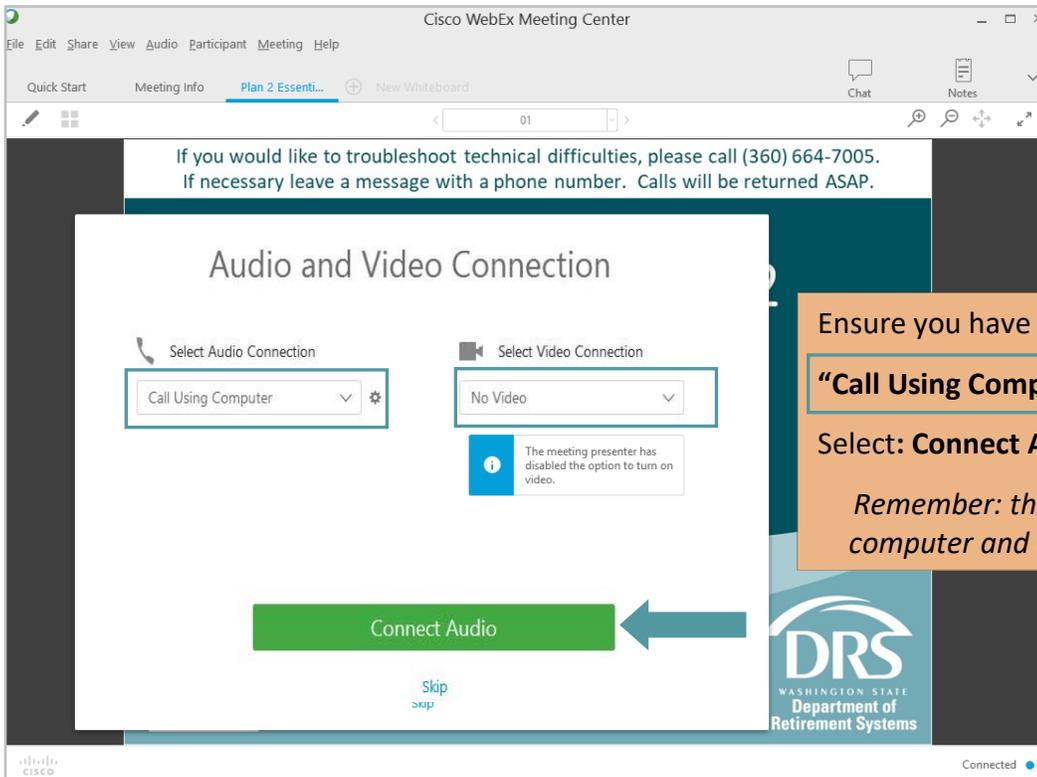

Having problems? [Run a temporary application](#) to join this meeting immediately.

Select: **Run a temporary application**
Select: **Run** if you receive another pop-up

This website wants to install the following add-on: 'WebEx' from 'Cisco WebEx LLC'. [What's the risk?](#)

You might see a message asking you to install a WebEx add-on. You should be able to ignore this message and run a temporary application instead.

The WebEx Meeting Center will open on your screen along with an opening slide. It may take a moment to load.

Ensure you have selected:

“Call Using Computer”

“No Video”

Select: **Connect Audio**

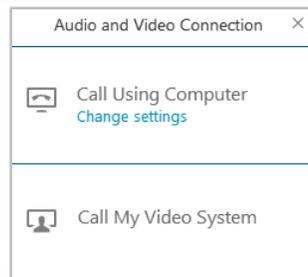

Remember: the audio comes through your computer and a microphone is not needed.

After selecting “Connect Audio” you should be automatically connected to the webinar’s audio. If you have a microphone, please keep it muted.

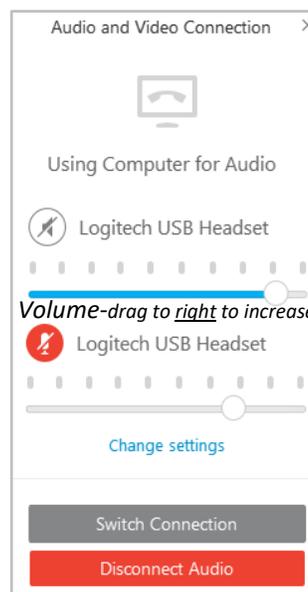

If your audio isn’t working:

1. Select: **Audio** at the top of your screen
2. Select: **Audio and Visual Connection**
3. Select: **“Call Using Computer”**
4. Select: **“OK”**

If you receive a pop-up stating no microphone was detected on your system-be sure you select “ok”. You don’t need a microphone but if the pop-up has an “ok” button you must select it for your audio to work properly.

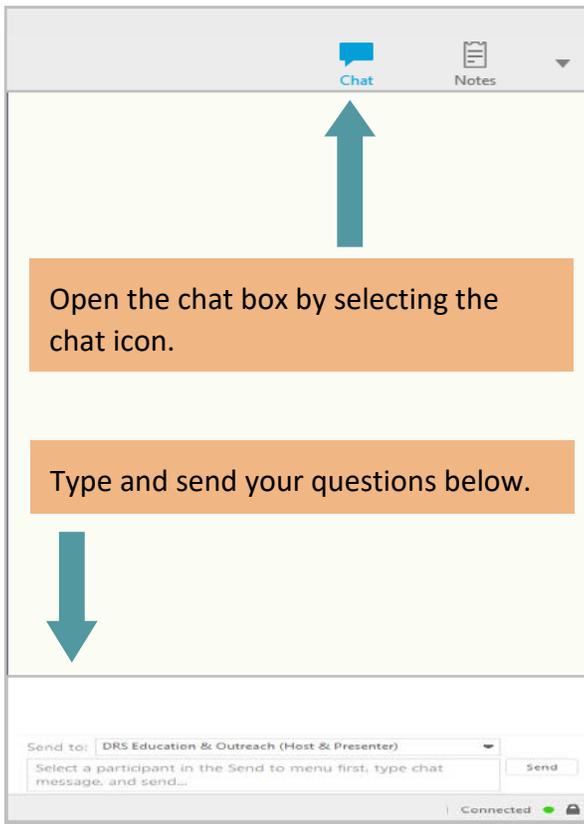

You may need to adjust the volume of your speakers or headset in WebEx.

If you’re still unable to access the audio call 360-664-7005 for troubleshooting assistance.

Questions for the webinar host?

Send them a chat.

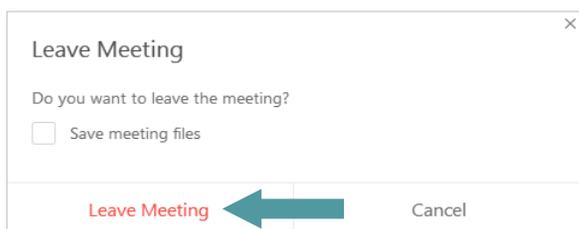

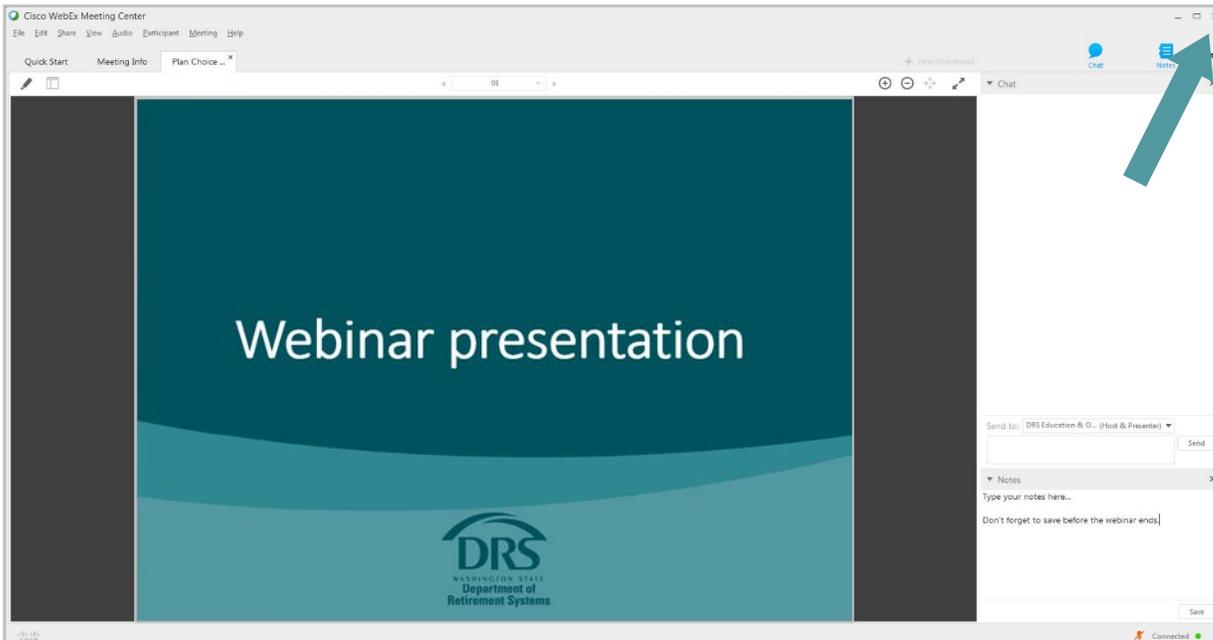

Open the chat box by selecting the chat icon.

Type and send your questions below.

When you're ready to exit, close the window and select "Leave Meeting".

Thank you for joining us.
