The new Employer Reporting Application (ERA) launch and full employer rollout is quickly approaching. Employers who agreed to be early adopters will start transitioning into ERA over a three-month period beginning in September. The full employer rollout will then start in December 2018.

To help make your transition into ERA as smooth as possible, Employer Support Services (ESS) will provide training for all employers at various locations throughout the state beginning August 9 and continuing through November.

During the three-hour session, we will explain the rollout process and the steps you will need to complete in preparation. You will also see what the new application looks like and learn about new features and functionality.

The topics covered will include:

- ERA Introduction
- Employer Management
- Member Management
- Employer Reporting
- Electronic Bank Account/Payment Management
- Upload Documents
- DCP

We are happy to provide you with the opportunity to learn more about ERA and look forward to meeting you in person.

Register for training now.
